09/883,121

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In Re Application Of: P. Fay et al.

Supervisory Examiner: M. Lateef

Application Serial No.: 08/883,121

Group/Art Unit: 3737

Filing Date: June 15, 2001

Examiner: J. Sanders

For: **METHOD OF MEASURING AND SIZING OBJECTS FROM AN IMAGE OF A  
HUMAN FACE USING IRIS SIZE**

U.S. Patent and Trademark Office  
Commissioner for Patents, P.O. Box 1450  
Alexandria, Virginia 22313-1450

DECLARATION

The undersigned declarant has been warned that willful false statements and the like are punishable by fine or imprisonment, or both (18 U.S.C. § 1001) and may jeopardize the validity of the application or any patent issuing thereon. All statements made of my own knowledge are true, and all statements made on information and belief are believed to be true. Declarant notes that the co-inventor, Pierre Fay, previously submitted a Declaration in this case, dated December 29, 2003 shown at attached Exhibit A. The undersigned declarant confirms the facts stated in Exhibit One, including the fact that the undersigned declarant was not reachable by Mr. Fay.

Attached at Exhibit B is a copy of a spreadsheet that I created on June 16, 2000. This creation date is evident by viewing the document properties that accompany the spreadsheet, as shown at Exhibit C.

The invention was worked on at least 17 days prior to producing this document. This is clear because I performed many manual calculations in order to validate the accuracy of the idea. The manual calculations were originally done with paper and pencil. Those original calculations no longer exist because, once I started transferring data to the spreadsheets, I threw away the original written notes. Those notes were very probably undated, as I recall.

**BEST AVAILABLE COPY**

The spreadsheet shown at Exhibit B contains roughly 1500 pupil distance measurements. These measurements were gathered together in this spreadsheet document in order to provide supporting data for the patent application. The corresponding manual calculations thus numbered at least 100, in order to provide a broad data set to validate accuracy. Considerable time was required for me to pull each data set from our database and validate its accuracy. Each image had to be manually loaded in Photoshop, the pixel distance between the center of the pupils and iris size measured, the pupillary distance calculated, and the manual result compared to our computed result from our imaging machine. The full process for a single test would take at least 15 minutes. Over the course of 100 images, that amounts to 1500 minutes, which corresponds to 25 hours. During this time, I also had other responsibilities to fulfill for the company. I completed at most 40 images per week, which required more than 17 days. This puts the date of conception before May 31, 2000.

I emphasize that the numbers I have provided above are minimum numbers, and the actual amount of time preparing the spreadsheet in Exhibit B very probably extended to more than 3 weeks. Of course, additional time was also needed to set up this system for validating the accuracy of the invention, as implemented by our imaging machine.

The present application claims priority to a provisional application filed June 16, 2000. The declarant hereby declares that this invention was conceived prior to May 31, 2000. Following that conception, the invention and application were pursued with due diligence until filing the provisional application on June 16, 2000.

  
Michael P. Shanley

**DECLARATION**

The undersigned declarant has been warned that willful false statements and the like are punishable by fine or imprisonment, or both (18 U.S.C. 1001) and may jeopardize the validity of the application or any patent issuing thereon. All statements made of my own knowledge are true, and all statements made on information and belief are believed to be true. Declarant notes that the co-inventor, Michael P. Shanley, could not be reached after diligent effort, and the present declaration is submitted on behalf of myself and the nonsigning co-inventor.

The present application claims priority to a provisional application filed June 16, 2000. The declarant hereby declares that this invention was conceived prior to May 31, 2000. Following that conception, the invention and application were pursued with due diligence until filing the provisional application on June 16, 2000. The declarant is aware of facts proving such conception and due diligence, and will attempt to contact and work with Mr. Shanley to produce records substantiating the present declaration, should that become necessary.
